ZYR TOKEN WHITEPAPER

Swiss Crypto Payment Platform

zyron.ch

VERSION 1.0 · APRIL 2026

IMPORTANT DISCLAIMER

This whitepaper is for informational purposes only and does not constitute financial, legal, or investment advice. The ZYR token is a utility token for use within the Zyron platform. Purchasing ZYR tokens carries risk. Please consult qualified advisors. This document is subject to change. Zyron complies with Swiss FINMA regulations.

1. Executive Summary

Zyron is a Swiss-based crypto payment platform enabling instant, feeless payments between clients and professionals — freelancers, creators, designers, musicians, developers and businesses. Built on Ethereum and based in Lugano, Switzerland, Zyron bridges Swiss financial precision with the decentralized economy.

The ZYR token is the native utility token of the Zyron ecosystem. It powers all platform transactions, rewards active participants, and enables governance. With a fixed supply of 50,000,000 ZYR and zero platform fees, Zyron offers a compelling alternative to traditional payment processors charging 2-5% per transaction.

Token Name	Zyron Token
Ticker Symbol	ZYR
Blockchain	Ethereum (ERC-20)
Total Supply	50,000,000 ZYR
Platform Fee	0%
Smart Contract	Berlin EVM Compatible
Jurisdiction	Switzerland (Lugano)
Website	zyron.ch

2. Problem & Solution

The Problem

- Traditional payment processors charge 2-5% per transaction
- International payments take 1-5 business days
- Freelancers and creators lose significant income to platform fees
- No transparent on-chain record of professional payments
- Cross-border Swiss payments involve unnecessary friction

The Zyron Solution

- ✓ Zero platform fees — 100% reaches the recipient
- ✓ Instant settlement in under 2 seconds
- ✓ Fully non-custodial — users control their own funds
- ✓ Transparent blockchain record — every payment verifiable
- ✓ Multi-language: German, French, Italian, English
- ✓ FINMA-aware design — Swiss regulatory compliance

Market Opportunity

Switzerland has over 600,000 registered freelancers. Lugano is a leading Swiss crypto hub — home to Plan B, the city that adopted Bitcoin and USDT as official means of payment. The Swiss freelance market processes over CHF 15 billion annually. Even capturing 1% represents CHF 150 million in payment volume on the Zyron platform.

3. The ZYR Token

Token Utility

ZYR is a pure utility token serving as the medium of exchange on the Zyron platform, granting holders access to platform features, governance votes, and reward programs.

Feature	Description
Payment Medium	Send and receive payments for professional services
Platform Access	Register as a verified professional on Zyron
Governance	Vote on upgrades, fee changes, and new features
Rewards	Active professionals earn ZYR from the platform reserve
Staking (v2)	Lock ZYR to earn yield and gain priority listing

Token Economics

ZYR has a hard-capped supply of 50,000,000 tokens — no additional tokens will ever be minted. This deflationary design ensures long-term value preservation. A percentage of tokens from inactive wallets may be burned quarterly, further reducing supply over time.

4. Token Distribution

The 50,000,000 ZYR supply is allocated across four categories to ensure long-term sustainability, fair distribution, and ecosystem growth.

Allocation	Tokens	Percentage	Vesting
Public Distribution	30,000,000	60%	Immediate
Platform Reserve	12,500,000	25%	24 months linear
Team & Founders	5,000,000	10%	12m cliff + 24m
Advisors & Partners	2,500,000	5%	6m cliff + 12m

Use of Funds

Category	Allocation
Platform Development	40%
Marketing & Growth	25%
Legal & Compliance	15%
Operations	12%
Reserve Fund	8%

5. Platform Architecture

Smart Contract

The ZYR token is an ERC-20 smart contract on Ethereum, written in Solidity 0.8.20 with Berlin EVM compatibility. Key features:

- Non-upgradeable — immutable contract code once deployed
- Non-custodial — platform never holds user funds
- Professional registry — on-chain verification of service providers
- Direct payment with optional message (invoice reference)
- Reward distribution from platform reserve
- Ownership transfer for future decentralized governance

Technology Stack

Layer	Technology
Blockchain	Ethereum Mainnet
Smart Contract	Solidity 0.8.20 · ERC-20
EVM Version	Berlin
Frontend	HTML5 · CSS3 · JavaScript
Wallet Integration	MetaMask · Web3.js
Hosting	Infomaniak (Switzerland)
Domain	zyron.ch

6. Roadmap

Q2 2026

Phase 1: Launch

- ZYR smart contract on Ethereum Mainnet
- zyron.ch platform live with professional registry
- MetaMask integration
- Initial Swiss marketing campaign in Lugano

Q3 2026

Phase 2: Growth

- Mobile-optimized platform
- DEX listing on Uniswap V3
- CoinGecko & CoinMarketCap listing
- 100+ verified Swiss professionals

Q4 2026

Phase 3: Expansion

- Staking mechanism launch
- Governance portal for ZYR holders
- Business accounts with invoice generation
- Expansion to DE, AT, FR

Q1 2027

Phase 4: Scale

- API for third-party integrations
- Zyron Pay widget for websites
- Swiss crypto exchange partnerships
- 10,000+ active users milestone

7. Team & Legal

Legal Structure

Zyron is operated as a Swiss entity based in Lugano, in compliance with Swiss law and FINMA guidelines. The ZYR token is classified as a utility token under Swiss DLT legislation. We are committed to full regulatory compliance and transparent operations.

Regulatory Compliance

- Swiss DLT Act compliance — ZYR classified as utility token
- FINMA guidelines — no unlicensed securities offering
- GDPR & nDSG compliant — Swiss data protection standards
- AML/KYC procedures for business accounts
- Smart contract audited prior to mainnet deployment
